Country Data not included

- Belgium
- Bosnia
- Armenia
- Estonia
- Malta
- Croatia
- Macedonia
- Albania
- Norway
- Luxembourg
- Israel
- Moldova
- Turkey
- Ukraine
- Bulgaria
- Hungary
- Montenegro
- Romania
- Russia

Treatment

- New direct acting antivirals (DAAs) – sustained virological response (SVR) in approximately 90%-95% of patients
- PWH were infected through blood and blood products supplied by the state or health authorities
- Righting the wrongs of this tragedy through access to treatment

Treatment

- Eradication of Hepatitis C infection in haemophilia achievable in short to medium term as it is a small population
- Requires advocacy and resolve
- Hepatitis C will be effectively eradicated in Irish PWH in 2016
- Scotland and Portugal have strong national treatment programmes
